TEACHING WITH REINFORCEMENT

Book Kay Laurence

Teaching with Reinforcement explains reinforcement patterns and the many types of positive reinforcement training as applied in clicker training, first learning, instinctive behaviors, and lifestyle management.

Reinforcement is a fascinating topic that threads through all of your interactions with your dog. Your conscious and unconscious reinforcement strengthens or weakens behavior. By understanding and recognizing reinforcement patterns you can teach with ease, removing a lot of stress from communication and increasing the joy in your relationship.

This book explains why it's important not to take good behavior for granted. Once you have worked hard at re-balancing a behavior you will begin to realize it is much easier to maintain what you want, rather than assume it will stay the same.

CULTURE CLASH

Jean Donaldson

The Culture Clash is special. Written in Jean's inimitably informal yet precise lecture style, the book races along on par with a good thriller. The Culture Clash depicts dogs as they really are - stripped of their Hollywood fluff, with their lovable 'can I eat it, chew it, urinate on it, what's in it for me' philosophy. Jean's tremendous affection for dogs shines through at all times, as does her keen insight into the dog's mind. Relentlessly, she champions the dog's point of view, always showing concern for their education and well being.
